

(a) Directed relation

Some patients carrying mutations in either the **ATP6V0A4** or the **ATP6V1B1** gene also suffer from **hearing impairment** of variable degree.

(PMC3491836)

Directed relations:

ATP6V0A4 Promotes **hearing impairment**

ATP6V1B1 Promotes **hearing impairment**

(b) Undirected relation

Finally, new insight into related **musculoskeletal complications** (such as **myopathy** and **tendinopathy**) has also been gained through the (...)

(PMC4432922)

Undirected relations:

musculoskeletal complications Associated **myopathy**

musculoskeletal complications Associated **tendinopathy**
